<i>Annual Touchup (1h30m)</i>	_____	<i>R1 300</i>

MICROBLADING

SEMI-PERMANENT SOFT NATURAL BROWS

Created by stroking a pigment dipped blade through the skin to mimic natural eyebrow hair. This procedure implants the ink very shallowly which makes the procedure painless and lasts 1-1.5 years. Yearly color refreshers can be done to make them last indefinitely. Hair stroke eyebrows otherwise known as the hair simulation technique, is a technique used for creating the most natural eyebrows possible. This innovative technique is extremely natural looking compared to a solid fill.

Microblading is a 2 step procedure. The hairs need to be placed a certain distance apart to prevent migration and an undesired solid healed result. First session the adult and teenager hairs are placed, 6 weeks later the other half of baby hairs are drawn in between the first set of hairs.

HOW TO PREPARE FOR YOUR APPOINTMENT

To avoid compromising the treatment and to ensure you are as comfortable as possible, please see below:

- + Avoid drinking coffee or alcohol or energizing drinks on the day of treatment. This can increase adrenaline levels and cause more pain/ compromise effectiveness of the anesthetic.*
- + No Aspirin, Niacin, Vitamin E or Ibuprofen (Myprodol, Mypaid, Gen-Payne) 48-72 hours before treatment. This can cause blood thinning and can have a negative effect on the anesthetic. Medication can be resumed 72 hours after treatment.*
- + Do not use omega-3 (fish oil) 1 week before treatment.*
- + No waxing 2-3 days before treatment.*
- + No Chemical peels, dermabrasion, laser or any other intense treatment 2 weeks before treatment.*
- + Botox/ Fillers (10 days prior as we will be stretching the skin around the eyes and forehead area.*
- + Roacutane / Oratane or any other form of oral acne medication within 6 months.*

MICROBLADING AFTERCARE

DAY 1

- + *No exercise for first 8 hrs. Apply aftercare (supplied) before training.*
- + *Dab brows with cotton wool every 90 minutes to remove lymph on skin, after dabbing, apply thin layer of Bepanthen/ vit AD (Supplied) to prevent scab formation.*
- + *Evening: wash face as normal with facial cleanser. Avoid touching brows. Apply thick layer of Bepanthen/ Vit AD (Supplied) ointment before bed time.*

DAY 2-5

- + *Wash face as usual, avoiding friction on brow area. Apply thin layer of bepanthen/ vit AD ointment frequently. Do not let the area dry out. Do not apply bactroban as it will pull out the color.*

COLOUR CYCLE

DAY 1-4

- + *Color will be very dark.*

DAY 4-14

- + *Color will vanish and appear patchy and light.*

DAY 14-42

- + *Color will start to resurface, darken, and smooth out more and more every week. Wait 6 weeks for color to fully develop.*

Thank you!
